### Licensure and Certification

### Academic Appointments

Year	Academic Title	Institution
2009 – Present	Faculty	Clinical Research Informatics and Data Management, Center for Health Informatics and Bioinformatics, New York University Medical Center
2008 – Present	Assistant Research Professor	New York University, Department of Child and Adolescent Psychiatry
1979 –Present	Assistant Research Professor	New York University, Department of Psychiatry
1982-1986	Visiting Lecturer	Yale University
1977-1982	Adjunct Professor	Rockland Community College

## Major Research Interests

Major research interests are clinical research services methodologies and clinical research informatics. I have a significant interest in developing innovative methods to improve the efficiency and effectiveness of conducting clinical research with particular emphasis on reducing the time required to implement and complete research studies. Having worked in clinical research for over 35 years, with an extensive background and experience in technology, an additional research interest is in developing clinical research informatics products. More specifically, I have an interest in applying information science, computer technology and other technologies to develop informatics solutions and/or products to facilitate clinical research. I also have an interest in developing clinical research databases, especially for long term clinical research studies.
