

From the Desk of the Associate Dean

Anthony J. Grieco, M.D. '63, '60A
Associate Dean for Alumni Relations

IN THE MIDST OF ALL THE SERIOUS CONSEQUENCES of the September 11th attack, our medical students made me very proud by their volunteer work in assisting the victims and their families. Our students offered to help medically at the scene and at designated treatment areas; they helped families to locate their loved ones at various hospitals; they comforted people as best they could; they helped the Medical Examiner to obtain DNA samples. They did much more, but one of their most distinctive accomplishments, in my view, was the Memorial Ceremony they held ten days later. At that student-organized event, members of all four classes packed the hall. The Student Council President, Brian M. Shuch of the Class of 2004 opened the session, with Mariano J. Rey, M.D. '76, Associate Dean for Student Affairs, and Veronica M. Catanese '79, Associate Dean for Medical Education, giving their remarks. Students from four major faith groups then led the students in prayer. Samir Thadani '04 represented the South Asian Students Association; Jacob Lee '04 represented the Christian Fellowship; Doron Stember '04 represented the Jewish Student Association; and Omar Ibrahim '03 represented the Muslim Student Association. Dean Robert M. Glickman, along with Dr. Rey and Dr. Catanese, then administered to all the assembled students an "Oath of Affirmation to Humanism in Medicine." The Oath was written by the students themselves, particularly by Anne Marie Fogerty '03. I believe that the Oath is appropriate for all of us at all levels of education and training, and I recommend that you share it with your own colleagues and students. [See below.]

Some of our students have vividly recorded their reflections about the tragedy. For example, Denitza Blagev '03, the leader of the NYU School of Medicine's Creative Writing Club and the Editor of *Agora*, the students' literary

(Continued on page 2)

Affirmation to Humanism in Medicine

As I continue to pursue my medical studies, I solemnly reaffirm my commitment to the service of humanity and I will encourage others to make the same pledge;

I will always remember that the purpose of my medical training is to attain the skills and knowledge necessary to treat sickness, alleviate suffering, and give hope to all those in need;

As a medical student, I pledge that my quest to become a physician will never be motivated by a desire for personal gain or wealth;

Instead I will strive to bring comfort and healing to all people, without regard to malady, race, religion, national origin, or ethnicity.

I understand that the ability of the medical community to help others depends on the physical and mental health of its members;

I therefore vow to recognize my personal needs, forgive my limitations, support my colleagues and seek comfort in our shared strength.

If devastation should ever strike my country, my community or my patients, I will assume my duty to provide the best care of which I am capable by applying my medical experience and working to create an atmosphere of calm and safety;

I will answer my call with compassion, dedication, and generosity;

I pledge that I will, to the best of my ability, live up to the highest standards and most enduring values of the medical profession.

(Continued from page 1)

and arts magazine, wrote a moving diary of the first few days following the attack. Her comments were published in the St. Paul, Minnesota Pioneer Press. You can read her remarks on the Web at <http://www.pioneerplanet.com/sevendays/mon/news/docs/139740.htm>. Of course, narrative skills are essential for physicians. Our School of Medicine recognizes this by requiring each student to write a formal essay during the Medicine clerkship. Impressed by the quality of our students' writing, William King Peck, M.D. '43D, has taken a special interest in their essays. An established writer himself, Dr. Peck has corresponded personally with many of our medical students offering his comments and critique of their narratives. Sharing his insights in regard to both grammar and content,

While we're on the topic of writing, I must mention the *Bellevue Literary Review* ("BLR"). By this time you should have received in the mail the inaugural issue of this "journal of humanity and human experience." Created by Martin J. Blaser, M.D. '73, and edited by Jerome Lowenstein, M.D. '57 and Danielle Ofri, M.D., Ph.D. '93, the BLR was established as a forum for prose and poetry that touch upon relationships to the human body, illness, health and healing. Future issues will be available via subscription at a nominal fee.

Let me tell you about another new initiative. Richard B. Einaugler, M.D. '63, and Thomas R. Kuhns, M.D., a graduate of the NYU ophthalmology residency training program, are working together to gather funds to establish *The Harvey M. Taterka, M.D. Ophthalmology Library*.

This reference library will be a tribute to Dr. Taterka, who was their faculty mentor during their ophthalmology training. Dr. Taterka was, in the words of Dr. Einaugler and Dr. Kuhns, "a compassionate human being, great teacher, physician, husband, parent and friend." The library will be housed in the Frederick L. Ehrman Medical Library at the School of Medicine. If you would like to contribute toward the development of this library, your donation would be greatly appreciated.

I thank all of our alumni for your generosity. I am pleased to report that our alumni contributed nearly six million dollars to the School of Medicine this past year, with five million dollars going to restricted funds and about \$900,000 composed of unrestricted gifts to the Alumni Fund. Thank you very, very much! ■

I thank all of our alumni for your generosity.

Dr. Peck hopes that our students will be encouraged to continue writing and to seek publication of their works.

Stimulated by our students' writing and Dr. Peck's responses, the Master Scholars Program at the School of Medicine plans to publish a journal, which will be entitled, *Dialogues on Medicine, Humanism and Professionalism*. It will contain student essays with commentaries by members of our faculty, as well as by our alumni. I invite all alumni to consider participating in this project by sharing commentary on the students' thoughts or by submitting your own personal reflections in the form of essays, poetry, photography and artwork. Please feel free to contact me at 212-263-5390 with your questions and comments.

Young Alumni News

I WAS PLEASED TO BE ASKED BY DR. GRIECO to serve as the first president of the Young Alumni Club. After graduating from the School of Medicine in 1997, I did my residency in Internal Medicine at NYU Medical Center/Bellevue Hospital, and stayed for an additional year as chief resident. Currently I am a Clinical Fellow in Endocrinology at Columbia Presbyterian. Besides preparing me extremely well for my future training, the School of Medicine was the starting point of many wonderful friendships. I'm looking forward to reconnecting with old classmates, as well as meeting other young alumni as we work together.

The creation of the Young Alumni Club marks a new effort to reach out to alumni who are within 10 years of their graduation from the NYU School of Medicine. We are planning a series of events and activities across the country targeted towards the interests of younger alumni who are currently in training, or in the early years of their careers. In addition to social activities such as wine tastings or dinners, we hope to foster contacts and mentorship opportunities between recent graduates and current medical students.

One of the challenges of the Young Alumni Club will be getting in contact with all of you! The early years after graduation are marked by many moves and multiple addresses. We are currently working on updating the alumni website and including a section on Young Alumni. Eventually this website should allow you to update your contact information as well as obtain contact info on fellow alumni. In the meantime, we ask that you get in touch with the Alumni Office so we can add you to our newsletter and email lists.

In my new role I've been invited to several School of Medicine events, including a recent Board of Governors meeting. One of the many things discussed was the outstanding response of the School of Medicine during the September 11th tragedy. I was impressed and moved by the description of medical students volunteering both at Bellevue and at support sites for victims' families. Many of these students had arrived

Tracy L. Breen, M.D. '97
Young Alumni Club president

at medical school only weeks before and worked selflessly during those heartbreaking days.

This has been a very hard month and at times it has been difficult to try and go on with our normal routines. Hopefully, many of our upcoming events will provide you an opportunity to come together with old friends and classmates. I will be attending the Greater New York Brunch in Greenwich on October 28th, and there will be Young Alumni Reps at the regional brunches taking

The creation of the Young Alumni Club marks a new effort to reach out to alumni who are within 10 years of their graduation from the NYU School of Medicine.

place over the course of the year in San Francisco, Los Angeles, Boca Raton and Boston. I hope many of you will also join me at the NYU School of Medicine Holiday Brunch at the school in mid-December.

I want to work with you to make the Young Alumni Club a vibrant part of the School of Medicine community. Please contact the Alumni Office or me if you would like to get involved or have an idea for a Young Alumni Club event in your area. My email address is tracybreen@hotmail.com and the number for the Alumni Office is (212) 263-5390. I look forward to hearing your ideas and suggestions. ■

1952, A Year to Remember

Are you a School of Medicine graduate from the year 1952? If so, don't miss the opportunity to be a part of the yearbook currently in production, for the upcoming class reunion in April. Edwin S. Robbins, M.D. '52, *Class Reunion Chair*, is heading up this project. Want to get involved? Contact Dr. Robbins at (212) 369-5382.

Director To 2003
Anthony J. Grieco, M.D. '63, '60A

Director To 2002
Beth W. Lieberman, M.D. '73

Firm Naming Ceremony

In 1977, SAUL J. FARBER, M.D. '42, then Chairman of the Department of Medicine, initiated the "Firm" system as a mechanism to oversee medical student and house staff education in the department. When Martin J. Blaser, M.D. '73 became Chairman in 2000, he focused the Firms entirely on medical student education. Each Firm Chief is responsible for overseeing the educational experience of one group of third-year medical students on the Medicine clerkship for each block during the academic year. The Firm Chief functions as an advisor for medical students who are, or who have been, in his or her firm. This responsibility includes academic advice, career counseling, helping with enrichment work if needed, and referral to other sources within the School of Medicine. The advisory relationship continues throughout the third and fourth years of medical school.

In recognition of the importance of the Firms for medical education, Dr. Blaser decided to name each Firm in honor of a distinguished figure in the history of the Department of Medicine. On October 3, 2001 a ceremony was held, formally naming the Firms, and officially installing the Firm Chiefs. The Firms have been named in honor of six alumni, Saul J. Farber, M.D. '42, H. Sherwood Lawrence, M.D. '43M, Bertha Rader, M.D. '45, Edward C. Franklin, M.D. '50, Ira M. Goldstein '66, Linda J. Laubenstein '73, plus two non-alumni, Lewis Thomas, M.D. and Austin Flint, M.D.

The Firm Chief functions as an advisor for medical students who are, or who have been, in his or her firm.

DR. FARBER was Chairman of the Department of Medicine at NYU and Director of Medicine at Bellevue and University Hospitals from 1966 to 2000. Concurrently, Dr. Farber served as Dean of NYU School of Medicine and Provost of NYU Medical Center from 1987 until 1998. Dr. Farber studied renal function in congestive heart failure, and was a pioneer in the understanding of the differences between renal and cardiac causes of the congested state. His research was largely conducted in laboratories at Bellevue Hospital in close proximity to the wards, where his broad knowledge of internal medicine made him an outstanding teacher to generations of students, residents and fellows. Dr. Farber is a recognized leader in medical education, clinical

research, and medical school administration. He led the New York University School of Medicine to national prominence and created an educational environment that has produced an extraordinary number of medical school faculty and clinician leaders. He continues to actively serve as an advisor to many people in the School of Medicine.

DR. LAWRENCE became Head of the Division of Infectious Diseases and Immunology in 1959, and Professor of Medicine in 1961. In 1964, he became Co-Director of the medical services at Bellevue Hospital and University Hospital. He served as Director of the NYU Cancer Center from 1974 through 1979, and as Director of NYU's NIH-designated Center for AIDS Research from 1989 through 1994. One of the founding fathers of the field of cellular immunology, Dr. Lawrence's scientific achievements include some of the earliest research on mechanisms of tissue damage and homograft rejection in man, as well as the discovery of Transfer Factor (a low molecular weight product of T-lymphocytes from sensitive individuals that confers specific immunity to mycobacterial, viral and fungal infections.) Dr. Lawrence's great interest in immunology was matched by his devotion to teaching. He often said that he considered the education and professional development of those he taught as his most important task. He came to know the third-year medical students intimately by leading the Saturday morning conferences during their clerkships in Medicine, and by moderating many of their clinical pathological conferences.

DR. RADER ran the electrocardiography service at Bellevue for many years, where her principal activity was instructing generations of medical students and house staff in electrocardiography. She was a familiar sight at all hours, delivering EKG interpretations to the wards, and guiding the staff in the correct application of the results to patient care. Dr. Rader ran the Rheumatic Heart Disease section of the Cardiac Clinic at Bellevue Hospital, which was the first Cardiac Clinic in the United States, established in 1916. She helped many young women with mitral stenosis through difficult pregnancies. Her devotion to her patients demonstrated the paramount importance of a close physician-patient relationship.

DR. FRANKLIN was an outstanding example of a physician-scientist. By applying the then new tools for analyzing protein structure, he made significant contributions, both to clarifying the fundamental

structure of antibodies, as well as to our understanding of specific clinical syndromes. Dr. Franklin's special contribution was his perceptiveness in recognizing those "accidents of nature" which the clinic provided that could yield insight into normal structure and function, and to then pursue these with thoroughness and rigor. Dr. Franklin's description of his discovery of the "heavy chain diseases" was truly a major scientific contribution. Dr. Franklin died in 1982 at the age of 53.

DR. GOLDSTEIN, while at NYU showed that the complement component C5a activated neutrophils via a specific receptor, suggested that it mediated tissue injury in the rheumatic diseases, and showed that complement and immunoglobulins, acting via discrete receptors – and in the absence of phagocytosis – caused neutrophils to release mediators of inflammation. He was the first to show that ceruloplasmin was the major extracellular scavenger of free radicals. Before his career was cut short by his untimely death in December, 1992, Dr. Goldstein had served as president of the American College of Rheumatology and had published more than 150 scientific articles. He served on the editorial board of several journals and was internationally recognized for his expertise in the field of inflammation.

DR. LAUBENSTEIN contracted paralytic poliomyelitis as a young child and was confined to an iron lung for three months, leaving her functionally paraplegic. She completed her residency in medicine and a fellowship in hematology/oncology at NYU Medical Center. She then joined the faculty at the NYU School of Medicine. She was a marvelous teacher who knew when to challenge, and when to reward her students. In 1980, Dr. Laubenstein, together with Drs. Kenneth B. Hymes, Alvin E. Friedman-Kien and others, noted a cluster of patients, who all were homosexual males, with Kaposi's Sarcoma, a rare condition at that time. This was the first clinical recognition of what was to be termed AIDS. She rapidly became known as a pioneer in the diagnosis and treatment of that disease, and she helped to found the Kaposi's Sarcoma Research Fund. In addition, along with Dr. Jeffrey Greene, Dr. Laubenstein founded Multi-Tasking Systems of NY, a non-profit organization created to provide a work place for persons with AIDS. She died in 1992.

DR. THOMAS joined the faculty of the New York University School of Medicine in 1954 as Professor and Chairman of the Department of Pathology. He became Professor and Chairman of the Department of Medicine in 1958, and was appointed Dean in

1966. Dr. Thomas made three important discoveries in the field of which he was a pioneer, immunopathology; each had implications for human disease. He found that leukocytes were important mediators of fever and shock brought about by bacterial endotoxins. He also made the novel observation that proteolytic enzymes such as papain could injure cartilage when injected into the circulation. The same sort of damage results when our own cells release papain-like ferments. But perhaps his most prescient suggestion, made years before the HIV pandemic, was that our immune system constantly surveys our body to find and destroy aberrant cancer-prone cells; we now attribute Kaposi's sarcoma and other AIDS related tumors to defects in Thomas's "immune surveillance." He died in 1993.

Dr. Blaser decided to name each Firm in honor of a distinguished figure in the history of the Department of Medicine.

DR. FLINT participated in the founding of Bellevue Hospital Medical College. From 1868 until his death he served as Professor of Principles and Practice of Internal Medicine and the first Chairman of the Department of Medicine at the Bellevue Hospital Medical College, from which New York University School of Medicine had its origins. During Dr. Flint's tenure at Bellevue, he achieved an outstanding reputation as one of New York's foremost clinicians, teachers, and consultants. Dr. Flint is credited with the original descriptions of abnormal breath sounds. In addition, two signs are familiarly identified with his name: Flint's law, pertaining to relationship of elevated audible pitch and diminished percussion resonance in pulmonary consolidation, and the Austin Flint murmur, indicative of aortic valve disease. Dr. Flint died in 1886.

The Firm Chiefs installed at the ceremony are: Mitchell H. Charap, M.D. '77, of the Dr. Bertha Rader Firm, Michael L. Freedman, M.D., of the Dr. Linda J. Laubenstein Firm, Anthony J. Grieco, M.D. '63, of the Dr. H. Sherwood Lawrence Firm, Martin L. Kahn, M.D. '63, of the Dr. Saul J. Farber Firm, Adina L. Kalet, M.D., M.P.H., of the Dr. Lewis Thomas Firm, Sandra H. Kammerman, M.D. '66 of the Dr. Austin Flint Firm, Jerome Lowenstein, M.D. '57, of the Dr. Edward C. Franklin Firm, and Elizabeth H. Weinschel, M.D. '78, of the Dr. Ira M. Goldstein Firm. ■

Have You Heard?

1930S

ISADORE RUDNIKOFF, '33, marked her 92nd birthday year with a golf game better than her age! Dr. Rudnikoff, a specialist in Internal Medicine, still attends hospital conferences weekly. She grows orchids in her greenhouse and has won many Ribbon Awards. **TIBOR J. GREENWALT**, '37, invented a method for handling blood and preventing the transfusion of incompatible blood types. Dr. Greenwalt has patented a way to prolong the storage of red blood cells. He is actively engaged in research on the metabolic changes in red blood cells. **MONTAGUE ULLMAN**, '38, is Clinical Professor of Psychiatry at the Albert Einstein College of Medicine. He has done vast amounts of work on dreams, including publication of "A note on the social referents of dreams" in 2001. He is still engaged in experimental dream group work here and in Sweden.

1940S

RAYMOND M. MARCUS, '42, dedicates his time to internal medicine. Dr. Marcus is one of the original physicians who founded the Kaiser-Permanente Medical Group in Los Angeles. **PHILIP ERLICH**, '47, retired in 1993 from a long career in Psychiatry. Prior to his retirement, he served as a Clinical Psychiatrist in the Division of Medical Assistance and Health Services of the State of New Jersey. In recognition of his noteworthy accomplishments, Princeton Medical Center has made him a member of their Honorary Staff. **HOWARD D. SLOBODIEN**, '47, and his wife Sally celebrated their 50th wedding anniversary in May, 2000. Dr. Slobodien of Metuchen, NJ, retired from private practice as a general surgeon in 1995 but is kept busy as Medical Director of the Breast Center at JFK Medical Center in Edison.

1950S

KENNETH S. GOULD, '52, is a retired Psychiatrist, now working at the Robert Wood Johnson School of Medicine. Dr. Gould is also a fellow of the American Psychiatric Association. **LEON HOROWITZ**, '52, '48WSC, has been appointed Clinical Assistant Professor in the Department of Medical Humanities at the University of North Texas Health Science Center at Fort Worth, Texas. **EDWIN ROBBINS**, '52, and his wife Lil celebrated their 45th Wedding Anniversary on Friday, July 27, 2001, with a party at the Fred Astaire Dance Studio in New York City. **PAUL J. SCHMIDT**, '53, wrote an article on the history of blood transfusion featuring Bellevue hospital. His article was published in *Transfusion*, Volume 41, July 2001. For more information check out, <http://www.transfusion.org>. **GORDON J. GILBERT**, '57, a neurologist at The Palms of Pasadena Hospital and a Clinical Professor of Physiology and Biophysics at the University of South Florida School of Medicine, continues to serve on the Board of Governors of the New York University School of Medicine Alumni Association. Dr. Gilbert enjoys his visits to NY for meetings, but resides in St. Petersburg, FL, where he is a member of the Board at the Museum of Fine Arts. He has lent two of his personal collection of paintings to the Metropolitan Museum of Art in New York for their Vermeer exhibit. **BERNARD M. ROSOF**, '57, is the Supervisor of Clinical Affairs/Quality at the North Shore-Long Island

Jewish Health System. Dr. Rosof assumed the office of chair, Board of Regents of the American College of Physicians—American Society of Internal Medicine (ACP-ASIM) on March 31, 2001, during the organization's Annual Session in Atlanta. **BERTON R. SHAYEVITZ**, '57, and wife, **MYRA SHAYEVITZ**, '59, are both lecturers for the Center of Bioethics and Humanities at Upstate Medical University in New York. Both consult for the N.Y. State Division of Disability Determination and tutor an Introduction to Clinical Medicine class.

1960S

JOHN A. KASTOR, '62, is the celebrated author of a book on teaching hospital mergers. For more information, check out, <http://www.press.umich.edu/titles/11196.html>. **LAWRENCE R. SHAPIRO**, '62, the Class President, is now the Director of Medical Genetics and Senior Attending Physician at Westchester Medical Center in New York. He has a medical license in 4 states. In 2000, New York Magazine voted Dr. Shapiro as "One of New York's Best Physicians." **LESTER J. KRASNOGOR**, '63, is the Director of the Pulmonary Medicine Section at Stamford Medical Center in Connecticut and a Clinical Associate Professor of Medicine at Columbia's College of Physicians and Surgeons. Dr. Krasnogor has established the Connecticut Center for Sleep Medicine at Stamford Hospital, in addition to his five-member group practice in pulmonary and critical care medicine. **MICHAEL J. NAPOLIELLO**, '66, President of PharmaSavant LLC in Princeton, New Jersey, has 25 years of experience in the pharmaceutical industry and has managed all phases of drug development, worldwide. Dr. Napoliello can speak and read Japanese, German, French, Italian and Spanish. **FRANK A. SIMON**, '68, is Clinical Professor of Pediatrics at Northwestern University Medical School in Illinois. Dr. Simon is also a reviewer for the *Journal of the American Medical Association*, and Secretary for the AMA Council on Medical Education.

1970S

MICHAEL O. OPPENHEIM, '72, specializes in Family Practice in Los Angeles, CA. In addition to being a full time hotel doctor, Dr. Oppenheim still managed to author five books and several hundred articles! **GIL ROSS**, '72, published an article in the OpEd Section of the August, 2nd issue of the *LA Times*.

1980S

MARIE E. VALDES, '81, is an Attending Surgeon at Putnam Hospital Center in Carmel, NY. Dr. Valdes has been the Chief of the OR Committee since 1997 and the Secretary of Medical Staff from 1999 to 2000. **MICHAEL L. MARGOLIN**, '82, is the Chief of Gastroenterology at Union Hospital in New Jersey. Dr. Margolin is also Clinical Assistant Professor at Seton Hall University's Post Graduate School of Medicine. He has a private practice, and co-founded the Garden State Endoscopy and Surgery Center. **JON M. KATZ**, '85, recently became the Chief of the Maternal-Fetal Medicine section at Sinai Hospital in Baltimore, MD and a member of the Board of Directors of the Maryland Obstetrical and Gynecology Society. Dr. Katz is also Assistant Professor of Gynecology and Obstetrics at Johns Hopkins University. **CHARLES H. ADLER**, '86, was recently promoted to Professor of Neurology at the Mayo Clinic in Scottsdale, Arizona.

Chair of the Brunch Committee, Bruce P. Pfeffer, M.D. '70 asks Dr. Grieco to join him at the podium.

Washington, D.C. Brunch

Howard Brown, M.D. '59 reminisces with classmate Marianne Schaullein, M.D. '59 and Dr. Grieco.

Dean Robert M. Glickman presents the Alumni Leadership Award to Tanya C. Lumpkins, M.D. '90 and Philip J. Marion, M.D. '85.

Stephen G. Schwarz, M.D. '95, with his wife, Melanie, and daughter, Jessica, Tony and Audrey Grieco, and Paul L. Kimmel, M.D. '76.

Dr. Adler's research has focused on Parkinson's Disease, dystonia, and the clinical use of botulinum toxin. He is also the Co-Director of the Parkinson's Disease & Movement Disorders Center. **JOSEPH S. WEINER**, '87, is Assistant Professor of Clinical Psychiatry at Albert Einstein College of Medicine. He is also the Director of the Patient-Doctor Relationship Program at the LIJ Medical Center in New York. Dr. Weiner and wife, Lisa, were recently blessed with a baby girl, Tessa Juliette.

1990S

ANNA BARRETT, '91, along with her husband, James C. McGowan are proud to announce the birth of their son Blake Brendan Barrett McGowan, born April 24, 2001. **IVAN ORANSKY**, '98, is currently Editor-in-Chief at *Praxis Post*, an online biweekly magazine of medicine and culture. *The Online News Association* recently nominated Praxis Post as one of four finalists for an Online Journalism Award in the category of "General Excellence in Online Journalism: Independent." Since 2000 Ivan, has published articles in many newspapers and magazines, including *USA Today*, *The Boston Globe* and *Slate*.
